

BatchMaster ERP for Fats & Oil

Keeping pace with changing times

BatchMaster ERP for Fats & Oil allows industry manufacturers to keep up with the changing market trends, guarantee quality and safety of the finished product, respond to the consumer demands on a timely basis, keep down storage as well as operational costs while meeting continuous production demands et al. Its integrated features also allow the manufacturers to raise the production and quality standards.

BatchMaster ERP also comes with quality assurance, bi-directional traceability and industry-best practices tailored to meet the precise needs of local as well as international compliances. Besides, it ensures your assets are properly managed and delivering their optimum output as the system effectively handles equipment, labors, shutdowns, budgets, service logs and complaints, and such.

BatchMaster ERP for Fats & Oil

With the world going the healthier way, BatchMaster ERP allows you to check for fat content, proper storage conditions with low moisture for perishability, loss of nutrients, color, taste, and viscosity.

- Ideal for handling all production models- engineer to order, configure to order, make to order, and make to stock cases
- Real-time analysis and monitoring of operational costs, including direct and overhead costs for each job
- Accurately measure cost of sales and costs deferred in further processing inventory
- Planning, evaluation and visibility of work in progress inventories
- Efficient handling of various legal entities for different geographic area and separate regulatory environments
- Proper Planning to eliminate machinery downtime and under-utilization of capacity
- Multi-lingual, multi-currency and multi-project support
- Effective management of assets- machines, vehicles, people and locations
- Specify different test conditions like: temperature, flash point, smoke point etc.
- Inventory movement and quarantine based on lot statuses with quality check at all points of the supply chain
- Access live activity updates from the field using mobile devices
- Schedule the correct volumes through the upstream processes to allow the required output
- Complete accountability of by-products and their processing
- Complete management and evaluation of inventory
- Comprehensive Procurement and Supplier Management with best vendor analysis
- Recipe and Formula Management
- Material and Package Costing
- Bi- Directional Lot Traceability and Lot Recall
- Allergen Management
- Shelf Life Determination
- Inspection Planning and Inspection Schedule
- Adverse Event and Complaint Reporting
- Lot Strength
- Nutritional Labelling
- Ingredient Statement and Report
- Corrective Action Preventive Action (CAPA)
- Non-Conformance (NC)
- Hazard Analysis and Critical Control Point (HACCP)
- FSSAI compliance
- Evaluate packing material consumption, its rejection due to quality issues and spares consumption
- Analyze and control losses due to returns, tracking sources of such losses and cost escalation
- Implementation of controls required by FSMA and preparation for SQF Level 3
- Identify the process loss and take corrective action for the same
- Determine and handle product shelf-life efficiently with expiry-based lot system
- Complete stock position, along with the quality of the stock, lot-wise
- Master Production Scheduling (MPS)
- Material Requirement Planning (MRP)
- Quality Assurance (QA) & Control

Why BatchMaster?

- 30+ years of experience
- True process-centric ERP solutions for small to mid-sized industries
- SAP B1 and Microsoft certified solution
- Over 40,000 users worldwide
