

BatchMaster ERP for Meat

End-to-end ERP to manage inventory, variability and market demand

BatchMaster Software provides specialized ERP solutions for businesses involved in slaughtering, butchering and meat handling.

With a low maintenance and ownership cost, BatchMaster Products provide an affordable way to manage your value chain right from purchase, inventory management, production to quality, compliance, sales and finance.

BatchMaster ERP for Meat

With over 30 years of experience, these Meat processing ERP software fully understand the complex challenges of the industry, and give the manufacturers a competitive platform to address these challenges in an effective way through features like:

- Bi-directional Traceability from vendor to customer and vice-versa
- Instant Recall functionality
- Catch weight – to help storage, production and sale in dual unit of measure
- Recipe management with inverse Bill-of-Material to support deconstruction
- By-product and Co-product management
- “What-if” cost analysis and comparison
- Processing, Packaging, Manufacturing and Work-in-Progress support
- Shelf-life and Best Before Date management
- Containerization for dispensing into multiple pack configuration
- Yield management for accurate planning, costing and reporting
- Quality assurance & management – for full compliance with CFR Part 11 and food safety initiatives
- Inventory control and management
- Lot Attributes and Potency
- Purchasing, receiving and return handling
- Internal Vs. External Warehousing (that include external cold storage facilities, multiple plants, etc.)
- Material and Production Planning

Why BatchMaster?
