

## BatchMaster ERP for Protective Coatings

### Protects your business environment

The protective coatings industry remains one of the most complex industries to operate in, due to the rigid environmental regulations, increasing awareness about the harmful effects of Volatile Organic Compounds (VOCs), supply-chain management issues, rising cost of energy and raw materials, constant need for innovation and introduction of new products, etc. These challenges create hassles in day-to-day functioning, and industry operators need an expert partner who can bail them out. BatchMaster ERP for Protective Coatings does exactly the same for them.

A tailor-made ERP, it can help the operators streamline their processes by getting rid of all the complexities. It manages the formulas effectively, meets the safety and regulatory criteria, allows the companies to come up with innovative products, ensures quality, plans demand forecasting, keeps the costs under check, allows timely strategic business decisions, improves management reporting, grants tighter control over inventory, helps with lot traceability and recalls, increases margins and profitability among other things.

# BatchMaster ERP for Protective Coatings

Its key features are:

- Formula Security with Revision Controls
