

BatchMaster Warehouse Management System Powered by SAP Business One

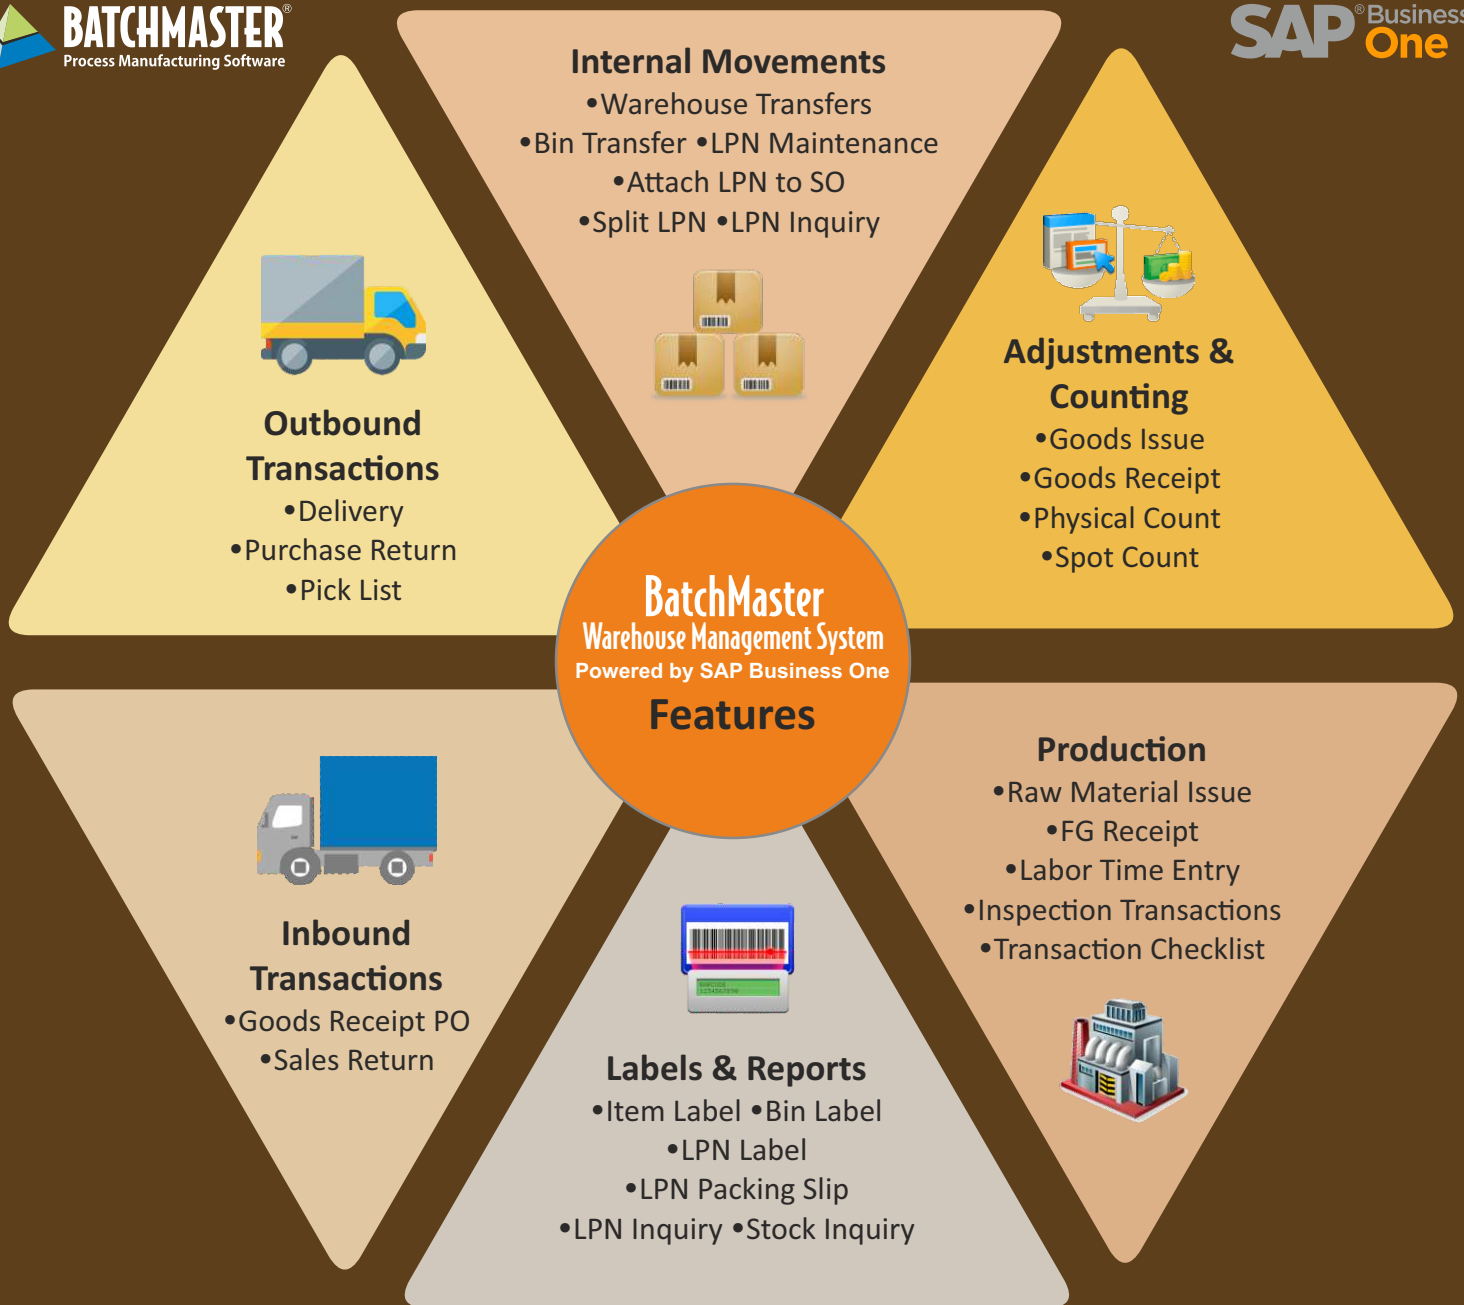

Complete Warehouse Management: From Gate-In to Gate-Out

BatchMaster Warehouse Management System (WMS) powered by SAP Business One is a stand-alone application based on SAP Fiori design with full responsive user interface designed for mobile devices like industrial handhelds and tablets that help to remotely perform various warehouse operations like receiving, shipment, all internal movements, LPN/Pallet management and shop floor transactions. The transactions performed gets posted to SAP Business One in real time manner giving you complete visibility and utmost accuracy.

As a result, manufacturers can record the warehouse transactions even at remotest corner of the industry. It records transaction right where it happens whether on the plant floor, on the fork lift, at receiving, at shipping, and anywhere in between. Eliminating

hundreds, maybe thousands of keystrokes, it controls and updates your inventory moves using a barcode scanner and attachment of mobile/handheld device tracks outgoing inventory, replenishment, cycle counting and receiving.

Ultimately, manufacturers have accurate and real-time information of all areas of their company and throughout all points in the supply chain. All transactions are recorded to the SAP Business One database instantly – no batch modes, no third party interfaces, no reconciliation programs to run later. This real-time and easily accessible information is essential to make smart decisions, better manage costs, reduce downtime and inventory excesses, and improve demand forecasting.

Benefits

- Improve inventory precision
- Increase warehouse productivity
- Process orders faster
- Improve picking & shipping accuracy
- Achieve more order accuracy
- Increases volume of outbound shipments; double your orders per day
- Improve employee productivity and keep personnel costs low
- Low TCO compared to alternatives
- Quick ROI
